Going Out in Scotland
Aberdeen, Dundee, Dumfries & Galloway, Glasgow, Edinburgh, The Highlands
It was the photo of Mary Whitehouse that most stuck in my memory. She who dared to prosecute Denis Lemon for publishing, systemically describing, and reproducing Lemon’s poem “The Conversion of the Sodomites” in 1977. The appeal of the action dragged on continually, and the outcome was, from an early stage, very uncertain, but eventually it was all settled (for the moment) at trial, setting free Lemon’s book, which is taking up far too many columns of this paper!

The walls were covered with material, from posters, to pamphlets and newsprint, from the forty years of the battle against the ACA (1911-1987), to the repressive attitudes of the 50’s (liberalism was never before, of course, in the near achieving 40 years later.) There was an event to celebrate the “Gay International Rainbow” which was won by trans rights in London and Wales. The 50’s, thankfully, were a thriving period of coming out, but this had been denied as in the far future, and the conference was held along and about the “coming out” on Manuscript Row.

There was (fortunately) discussion of gay marriage here, and wonder of CHE (Campaign for Homosexual Equality) which was very big in England and Wales in the 70’s. It made me recall being at CHE’s first annual conference, in Morecambe in 73. We were supposed to have had a town centre venue, but this had been denied us at the last minute, and the conference found itself at the draughty end of Morecambe Pier.

There was a (premature?) discussion of gay marriage there, and members of GLF (Gay Liberation Front) stood up and denounced the pursuit of this kind of equality—“let the straights have their hang ups and legal battles, we want to keep our relationships free and untrammelled” was the gist of their protest. Whilst I think it’s great that we now have civil partnerships, I can still see the point of the GLF objections. I feel divided; we haven’t managed to cast relationships anew— or have we? Have we helped straights rethink their love lives? Quite likely.

Again in the early 70’s I went to a London gay conference where I met members of the Barcelona Gay Liberation Front. “What?” I thought. “What amazing optimism. Gay liberation in Spain? With Franco and his cohorts ruling the show? But, of course, as soon as the fascist dictator died that country transformed. I have been able to enjoy the vibrant and dynamic gay life now available in Barcelona, a beautiful city crowded with delectable people.

Of course, not everywhere is now pro-gay or gay friendly. I recently talked with a young Indonesian guy who told me how impossible it was to raise the gay topic in his home village; he had come to the Netherlands as the best place in the world for him. Great! But it is to be hoped that some people stay and fight in their own countries, dangerous and even life-threatening as that can be. Else there will be no changes there.

Our big change is that no government can say that they have not even heard of gay rights, and if they repress and kill they can be known to repress and kill, and named and shamed. Things are not perfect here, and there are still much battles. “Gay Panic” defences, school bullying, are as much battles than when there were none. And there is progress in gay society. In England, there has been a new television programme which is doing very extensive and coming towards his breaking point. Much thanks I must say to the various, and in this context the)

I believe you are not exactly a political scientist, but this has been denied us at the last minute, and the conference was held along and about the “coming out” on Manuscript Row.

In Scotland, today, life is pretty damn good. I would urge you—go forth and indulge your freedoms!

More than a decade ago the world learned people in the Russian province of Chechnya were committing heinous crimes against sexual minorities, including extrajudicial executions. The human rights group, Human Rights Watch, found that people had engaged in cross-border violence and torture, which threatened sexual minorities. Many of those killed, beaten, and imprisoned were teens and children. The UN has reported that up to 300,000 people have been killed, tortured, or imprisoned since 1999.

In the wake of these reports, the International Gay and Lesbian Human Rights Commission launched an investigation into the situation in Chechnya. The commission, which has been monitoring the situation since 1999, has documented instances of torture, murder, and disappearance of sexual minorities.

The commission has also documented instances of torture and murder of sexual minorities in other parts of Russia, including Moscow and St. Petersburg. The commission has called on the Russian government to investigate these abuses and to take steps to protect sexual minorities from violence.

The commission is calling on the international community to support the work of Human Rights Watch and other organizations working to document and prevent human rights abuses against sexual minorities in Russia. The commission is calling on the Russian government to work with the United Nations to develop a more effective human rights framework for sexual minorities in the country.

I found Gardiners as a child around eighty years ago, following my parents teaching school which was particularly unusual and didn't go according to plan. When I was a small girl, I remember standing in the doorway of the school, my face transfixed by the sight of the schoolyard, and the view of the classroom, which was filled with children, some of whom were playing, and some of whom were sitting. The school is now a small primary school, but it was once a large kindergarten, and it was the only school in the area where I grew up. My parents taught there for many years, and it is where I spent most of my childhood.
